

# THE NORTHERN TRIBUNE

## AN INDEPENDENT WEEKLY NEWSPAPER

Published every Thursday at Grande Prairie, Alberta. The Tribune aims to be thoroughly "cover" the local news field with fairness to all sections and parties; also to aid in the development of the Peace River Country and help make known to the "outside world" many advantages as a home-land. All news is printed without intentional distortion. The paper's opinions are expressed only in its editorial columns.

Letters for publication are welcomed. A pen name may be used, though correspondents must also sign their proper names, not necessarily for publication, but as evidence of good faith. In publishing a communication, the Tribune does not imply agreement with any opinions contained therein.

Legal and other advertising rates furnished on application.

**Subscription Rates:**  
One Year, in British Empire... \$1.00  
Half Year, in British Empire... .75  
One Year, in U.S.A. .... 1.50

### SLAUGHTER OF ETHIOPIANS STILL GOES ON

When Mussolini took over the reins of government, as soon as he had made himself a real dictator, he started in to revive the glory of Old Rome. Rome, with its cruelty, Rome, with its cannibalism, Rome, with its pitiless in deadly combat the one against the other, and where Christians were torn to pieces by wild beasts to make a Roman holiday.

If this is the "glory of Old Rome," that Mussolini has certainly achieved his objective. If we are to judge by the statistics of the slaughter of Ethiopians by his modern death-dealing machinery.

There are many black spots on the pages of the history of mankind, but we know of none blacker than the invasion of Ethiopia by the Italian army. The irony of it all is that the nations of the world stand by and allow this modern atrocity to continue slaughtering people with whom we have and have not any difference or quarrel.

How long are the great nations of the world going to stand idle and allow this "Mad Dog of Europe" to continue to slaughter the slaughter of a people who are not even armed people?

The time has come when this war of aggression was before it started. France faltered, and to its policy at that time largely can be traced subsequent events.

Experience has taught that the only language which is understood by all is the language of the sword. The Italian people are not to blame for this most ignominious crime of the modern world. They are the victims, they are the slaves of the slaughter.

The slaughter of the invasion of Ethiopia by Mussolini is tantamount to an indictment against the League of Nations. Had this League stood firm, then it is doubtful if Hitler would have invaded the Rhineland, thereby adding still further to the danger threatening world peace.

As the Tribune stated in a previous issue: "As long as the human race exists, there will be wars. War is just as long will our boasted modern civilization be a mockery and the thoughtless people who are asking the question, 'Have we made any real moral progress in the last two thousand years?'"

### Along the Trail

By J. B. YULE

#### A STRONG SPIRITUAL APPEAL

On Saturday I chanced into the Thomson Hardware store, where I found several men peering over a card and having a good laugh.

As I was on my way out for the odd bit of news, I ventured to investigate the cause of all the merriment and found that two of the men were Steve Kray, had printed on it a picture of a stockman on the neck in a laconic of the "The Canadian Heather." Above the picture were the words, "I'm in the best of spirits at all times."

After everyone had his laugh, a short silence ensued. Then one of the group, "Finally one of the party broke the stillness. 'Steve no doubt meant all right, but the card was as cruel as the real McKay and in these depressed times we can't get together enough of the coin of the realm to buy one healthy snort.'

"I fully agree with you," observed another, "but we all must admit that the picture makes a strong spiritual appeal."

#### BIRDS THAT TALK WITH US ALL WINTER

The other day I had the pleasure of meeting Tom Emswiler, who represents the Lacombe Nurseries in the Peace River.

The conversation turned to discussing of birds that remain with us all winter.

The visitor, who lives about seven miles out of the city of Peace River and who takes a deep interest in bird life, told the following interesting story:

"He said that they put out fat on the top window sill in order to attract the birds."

A flock of five Chipping Sparrows found the sweet morsel and made frequent calls each day all during the winter.

A fair woodpecker found the cache and he too helped himself to the offering two and three times a day, regardless of how much snow there was. If there was not sufficient snow fat the bird would kick up a racket until the food was found.

"The remarkable thing," said Mr. Emswiler, "was that this bird did not stay in its morning calls by more than 15 minutes. The Chipping Sparrows afforded us a great deal of pleasure as they fed in the window ledge. Sometimes they would start around all day, no matter how cold the weather

### TREATY OF LOCARNO

By M. W. EAGAR

The producers of any article market it at a price which gives them a profit, and in many cases this not only provides for profit on the actual cost but for bad and doubtful debts, etc., as well. They will even go as far as fixing the price of their product in advance.

Alberta is not a manufacturing province, at least not yet. It will therefore require no argument to prove that all prices of manufactured goods to be produced in this province are a profit to the manufacturer.

The Grain Exchange, Winnipeg, has been giving a series of broadcasts, explaining how they can make the greatest benefits derived by the producer in dealing through a member of the Exchange.

There is, in my opinion, one way—and one way only—that grain can be handled at a profit and that is by the normal selling value. The Wheat Board at a price fixed on reasonable profit over cost of production.

The Board to then equalize the freight from the three western provinces. Live stock is the best way to handle the grain.

Over the ten-year period the grain producer has had his very full and very long years. He is only a human mortal and in the times of prosperity has allowed himself to be lulled into a normal selling value.

The whole world is going through a process of reconstruction and as there is not the slightest hope of these old debts ever being paid in full, and as they were created at prices far below the normal selling value, they should, without further childish delays, be adjusted.

Many practical jokes were played around town on April First (April Fool's Day) and many happy-go calls to the Tribune office during the forenoon.

The first caller was His Worship the Mayor, who wanted to know about "that insurance policy."

All took the joke with a smile. As far as the writer is concerned, he would like to know the party or parties who chose to make the Tribune the means for their barren pilgrimages. However, The Tribune staff saw the joke and had many a good laugh.

Anxious to know the origin of April Fool's Day, I did a little rambling along The Trail and finally got the following information from a friend: "Little is known of the actual origin of this day, so happy for the player and so foolish to the victim of the trick."

"In Hindustan the 31st of March is set aside for this practice, at which time the dupes are deceived by the pilgrimages. However, The Tribune staff saw the joke and had many a good laugh."

"Custom has established this affair for a set day, but as a time to send a person on a fool's errand such as a nightmarer, etc."

"When the person investigates he is told he has been called 'April Fool'."

### IN THE TRIBUNE'S MAIL BOX

#### BROKEN TREATIES

To the Editor of The Tribune: I wonder if the people of any other part of Canada have been treated so shabbily as we of the Peace River District by the powers that be.

As the editor says it, governments and municipal councils seem to have a special grudge against dogs, but no one has ever heard of a dog being advertised to the ends of the earth to secure settlers, and about two-thirds of our cattle and horses are on the strength of promises by both of our party leaders and the late Sir Henry Thornton.

When the present government was elected, they promised to give us 100,000 bushels of grain for export we would have a direct coast outlet. But we have not heard a word about it.

They promised to give us 100,000 bushels, besides winning six or seven acres of cheap land for each settler, and still no outlet. Meanwhile \$5,000,000 have been spent on the Hudson Bay line, and that line has a port frozen up for about ten months of the year, with insurance rates on coasts four times the rate from the port of Vancouver—a line built through a country of bog and muskeg.

From it is a 90-mile branch line to the Pitt River, built for the benefit of a bunch of New York capitalists. And now they have the nerve to tell us the Peace River's coast outlet is not necessary, although it would be a safe bet that there would be more traffic over a direct outlet to Vancouver than over their over-the-hill line.

It is a year—and built at a fraction of the cost of the Bay line—has been advertised to the ends of the earth to secure settlers, and about two-thirds of our cattle and horses are on the strength of promises by both of our party leaders and the late Sir Henry Thornton.

When the present government was elected, they promised to give us 100,000 bushels of grain for export we would have a direct coast outlet. But we have not heard a word about it.

### Will It Be War or Peace?

By I. V. MACKLIN

The nerves of the world seem to be badly shattered these days. There is feverish preparation for war in many countries, where dictators desire war rather than the overthrow of their personal power. The war activity drives nations like Britain and the United States to unprecedented expenditure for war preparation also. Even countries like Switzerland and Austria, which were formerly neutral, are now being drawn into the war.

But will it be war? My guess is no. Do the common people want war? No! Not even those of Italy or Germany. In war men abandon their God-given power of reason and resort to the jungle level of force. They resort to the slaughter of their fellow men, but it is not so much the intellectual men, they use that ability to hasten human destruction. It matters not whether those whom they kill are of another race or color or nation, they are nevertheless brothers. If it is wrong to murder one individually, how can it be right to murder them collectively?

We are in a vain conceit, we are too proud to believe that because it is wrong, when an aggressor attacks on any level the defender must meet him on that level or perish. The nation that is supreme in moral and intellectual values will not meet an aggressor on his own level. It is not that it cannot hold the right and conquer the evil. Military preparedness seems the only logical answer to the war-striving dictators of Italy and Germany, whose object seems to be as that of Germany in 1914—"War is our only way out."

In spite of public talk, lack of preparation on the part of nations has been the only alternative for peaceful nations. If Germany should again be the cause of world-wide anguish and drench civilization in a bath of human blood, it would be the experience the downfall of the German people, and the world would be a better place for it. It is not that it is not likely. Competition at home causes competition abroad, and international competition drives men—even though unwilling—to war, like men caught in the cogs of a great machine, says Tennyson:

"We are a race of men, a consequence. A consequence of what? A consequence of 'Rugged Individualism,' of ruthless competition—individually, nationally, and internationally. Nations are fighting between themselves, and nations are fighting within the nation. International law cannot effectively prevent fighting between nations, since there is no international police force to compel respect of the international will."

The solution of the war problem is found in cooperation. In competitive effort the success of one is often only achieved by the failure of the other; the greater the profit of one, the greater the loss of another. The expansion of one nation is only achieved by the contraction of the other. The vital struggle with regard to cooperation is that in such an activity the success of one does not involve the failure of another, but each can advance as well as the other. It is not that it is not likely. Competition at home causes competition abroad, and international competition drives men—even though unwilling—to war, like men caught in the cogs of a great machine, says Tennyson:

"We are a race of men, a consequence. A consequence of what? A consequence of 'Rugged Individualism,' of ruthless competition—individually, nationally, and internationally. Nations are fighting between themselves, and nations are fighting within the nation. and obtain from 30 to 40 bushels per acre.

"Let us take a hair of the dog that bit us," Build ANOTHER RAILWAY from the Peace River Whamstag area direct by the shortest route to the head of Portland Canal. This route will give Canada an average 450-mile railway haul for her export wheat.

"Build Another Railway" enters the fight for the construction of the Coast Outlet.

After pointing out that the Canadian National system cost the public treasury \$48,000,000 in 1935, The Architect writes editorially:

"The chief contributory cause of railway deficits, provincial ineffectiveness and adverse economic conditions come upon us when Australia and the Argentine, with profit to themselves, commenced to supply world markets with wheat at less per bushel than we could grow it, and by so doing destroyed the business of Canada's chief export commodity."

"Our railway burden was brought about by providing a transportation set-up to take care of shipping several million bushels of wheat and other grains from southern Manitoba, Saskatchewan and Alberta to Montreal and Vancouver for export. The land in these sections has, as in Minnesota and the Dakotas, become so impoverished that average yields now produced there cannot be sold in competition with the cheaply produced wheat from Australia and the Argentine."

"Until the wheat growers of Canada can compete with Australia and the Argentine without the necessity of arduous, subnormal prices, wheat prices and absorption of differential freight tariffs, we as a nation cannot hope to hold our own in the first position in the exporting of wheat, which, after all, is the life blood of this nation."

"This fact has been proven: When the prairie farmer was prosperous in the past, the whole of the wheat of Canada has suffered and so on the verge of bankruptcy."

"Last year 100,000,000 bushels of wheat produced in southern Manitoba, Saskatchewan and Alberta on impoverished and chemically treated land, was first sown, reaped and finally threshed, and then found to be as high as 50 cents per bushel the loss to the grower was \$48,000,000. It is obvious that our wheat growers cannot produce an average yield on the old burnt-out areas to compete with other export countries. The only way to improve the condition is to transfer a large part of the farming population to the Peace River and to grow wheat in northern Alberta and to produce number one hard wheat

for milling last year, would be sufficient money to construct another railway from the Peace River wheat area to the head of Portland Canal and provide all terminal facilities."

"The \$48,000,000 lost on wheat oil for milling last year, would be sufficient money to construct another railway from the Peace River wheat area to the head of Portland Canal and provide all terminal facilities."

"Ottawa could issue no-interest treasury bills, amortizable on a 5 per cent basis, these funds to be used for building the proposed railway to the head of Portland Canal. This investment would salvage Canada and a minimum of \$100,000,000 would be restored from products of the Peace."

"Let us take a hair of the dog that bit us" and build ANOTHER RAILWAY."

## Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright  
"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

**Merely a Touch of "Flu"**  
His fever'd skin was parched from scalp to sole.  
His head congested and his stomach sore.  
A puck'ry feeling every membrane had  
Nervous perspiration oozed from any pore.

He lay and tremed and coughed and blew his nose.  
Too sick to sleep. The minutes lagged along.  
How time can drag when illness does the night!  
How fancies Morphew with slumber come?

At least a start of sweating raised the hope  
Of fever's passing. Presently it ceased.  
But still the chills and burning chased themselves  
Throughout his aching limbs, until at last it broke.

He tells his tale to sympathizing friends  
As though the hero of a keen ordeal  
Are they impressed? Not quite as he had thought.  
Says one, "You never had a sickness real."

A dime's worth of timely repair  
May save a dollar's worth of good time in a busy season.

Beaverlodge experiments indicate that the soaking of vegetable seeds for one day is usually beneficial. Longer soaking is of doubtful value and in some cases is decidedly detrimental.

"Put not your trust in cattle," phrases the present mood of many a man who bought feeders last autumn, counting on the American market. Speculation entails risks. One should never speculate unless prepared to stand a loss.

Much misfortune is due to over-revering. Instead of being content to earn a modest stake we play for the big one, taking long chances of losing. This habit touches our farming system, influencing such important factors as choice of crops and varieties.

With mean temperature four degrees above the previous twenty-year average, March did something to avenge for February's vengeance, though we didn't smile much in doing it, for the 120 hours total of bright sunshine was the second-lowest since 1925, when it was 74.7 hours. Precipitation was but half the twenty-year average.

One trouble with the Peace River is the elevator marketing of too much low-grade wheat. Where the product

of good milling wheat is too uncertain we might well look around for a safer cash crop such as grass seeds and seed oats (which usually pay even though the market was foreshortened this year). More of the low-grade wheat might well be fed.

The general rule in sowing garden seeds is to plant them at a depth four times their diameter. Powdery seeds such as those of petunia and snapdragon may be merely pressed into the surface of damp ground. Small seeds need a firm, smooth seedbed moist practically to the top. Subirrigation is the best method of watering these. It may be accomplished by setting the pot or flat in water.

Alfalfa is a good form in which lime may be supplied to live stock. It is rich in lime as well as in protein. G. S. Meyer of Edmonton, Alberta, shipped in March seven loads aged six months and three days averaging 203 pounds when delivered at the Beaverlodge yards. These lots had neither milk nor tanage. They were fed chop, alfalfa hay and salt, but no mineral supplement. A splendid showing, indeed.

If the loathed nature does not heat satisfactorily the addition of boiling water will induce fermentation. After two or three turnings, six inches of soil may be added but seedling should not be done until the soil temperature has dropped back to 80° Fah. Thereafter watering is a big point to watch. Frequent dribblings are unsatisfactory. Water so as to soak the soil to the bottom. Ventilate to keep the bed temperature between 70° and 80°.

A salty atmosphere under the cover tends to cause damping off. To frequent watering and too little ventilation brings about this undesirable condition, while a dry soil surface tends to keep it down. Sand sifted on the soil surface dries rapidly and is a means by which damping off is checked. Sand also prevents the soil from cracking and exposure to drying.

**Getting Started With Alfalfa**  
To get started with alfalfa I thought of obtaining a pound of seed, planting it in a row in the garden and producing seed for sowing in the field next year. — J.W.C., Eureka River, Alta.

Ans.: At the best the row sown in 1936 would not ripen seed before 1937, and since alfalfa is a perennial, it would be a satisfactory proportion of seed, even on the most frost-free land, there would be no guarantee of a seed crop for years. If prepared to take a chance, the plan would be all right and a pound could be made to sow.

**E. H. STRICKLAND,**  
Professor of Entomology,  
University of Alberta,  
Edmonton, Alta.

**Castro**  
I wish instructions on castrating young animals. — J.A.H., Lake Isle, Alta.

Ans.: Following is a memorandum to the Animal Husbandry Division of the Dominion Experimental Farms System on castration of calves by the knife method.

"The castration of young calves should take place at from two to three weeks of age, at which time the testicles are usually seen sufficiently to enable the operator to perform the operation successfully. At this stage there is comparatively little danger and the calf receives no setback. If done when the calf is older there is more danger of bleeding, therefore, more care is necessary, and under these conditions it is well to employ a skilled veterinarian.

"Prepare for the operation by having a good sharp knife and a quantity of warm water containing a little mild antiseptic. Wash the parts well first, and dip the knife in the water. Grasp the bottom of the sac and cut off the lower half inch or so of the same. Press out the testicles, which will still be found enclosed in the

half an acre in rows, although if wire-worms or cutworms were around such a thin seeding would run the risk of demotion.

**Sweet Grass**  
A high silage yield of 30 acres is so badly infested with sweet grass that it is useless trying to grow grain crops on it. Alfalfa will do well to sow it to alfalfa, but this would, I suppose, be "choking the goose." — G.W.C.V., Fairbairn, Alta.

Ans.: Grain will fight sweet grass much better than new seedings of alfalfa will do, so the first task should be to clean up the land. A year's thorough summerfallowing out to accomplish it pretty well unless the season proves abnormally wet. Fallow early and fairly deeply, cutting and turning everything. Then keep back until autumn and, if necessary, back-etch either before harvest or before freeze up. Do not let green leaves show at any time if it can be prevented. Probably the one-way disk is the best implement to use for the cultivation, though after the furrow alleys is thoroughly broken up the spring-tine cultivator might be alternated with the disk. One member of our staff killed sweet grass in the fallow year by letting the new seedling promptly, plowing deeply and keeping back by cultivation. The danger of this method is that the mowing may not always be accomplished soon enough to prevent seed formation.

Start of a thorough cleaning process the best way we know of, however, is to cut the grass and let it rot to not too soddy is to spring plow thoroughly, work down and drill immediately. This method is suitable for growing cereal crop, barley preferred. Strong-germinating seed is important in order that the crop may set a quick start.

**Small White Worm on Wheat Roots**  
A small white worm was observed working at the roots of wheat at approximately the joint where the root leaves the kernel. Yields were reduced considerably. — S. A. H., Deer River, B.C.

Ans.: The trouble may be due to two possible insects. The first is the root root maggot. This attacks the germinating seed of corn or wheat. We have taken the adult flies here but have not seen any damage to grain. About three years ago there was a serious outbreak in parts of Saskatchewan with fairly heavy losses to wheat. I am not sure that such damage will be unusual here since this is a native insect, and there is only this one occasion on which it did any appreciable damage.

The second is the wheat stem midge. The insect lives inside the root just above the grain and occasionally it does quite serious damage to the southern part of the province. However, in many cases, the damage is more apparent than real. The maggots usually mature before killing the plants, which then recover and are again ready to grow very seriously. Here, again, the damage is not likely to occur from season to season.

**CLARKSON VALLEY**  
CLARKSON VALLEY, April 2 — The school meeting of Clarkson Valley School was held at Mr. Fred Griffiths' place on March 24. Routine business was discussed and the school site was picked and getting out the logs for the building started.

**HAZELMERE NEWS**  
HAZELMERE, April 2 — Mrs. A. McNamee visited her father, Mr. Frank E. Brown, this week.  
Mr. E. Hockley has gone to Edmonton on business.  
Pete Senko went to Grande Prairie to have an X-ray taken.

**SEEN AND HEARD**  
That (Hazelmer) "industrial stars" will soon be needing new hats, Harry being April-fooled. That was a kid name, Harry.

**LITTLE SMOKY**  
LITTLE SMOKY, Mar. 31 — On Saturday, March 28, Buster Quinn entertained a number of little friends to honor of his tenth birthday anniversary. And of course who were there is a bunch of little boys to gather there is plenty of fun and noise.

The Social Credit meeting was held at the home of W. H. Rogers on Saturday night, but the attendance was unusually small, principally on account of the stormy weather.  
On Friday, "Verne," the little son of Mr. and Mrs. Jas. Cunningham, suffered a severe attack of acute indigestion and was hurriedly rushed to the doctor.

Glenn Carpenter, who is recovering from an attack of typhoid fever, has been convalescent at his home for over a week.

**CORNWALL NEWS**  
CORNWALL, April 2, Cornwall school is nearly completed. George Giesberg cut shingles for the school.  
H. Farrell, E. Fisher and Misses Hughes and Mills took in the St. Patrick's dances at Delbert and reported a good time.

Mr. and Mrs. Roy Reynolds visited Mr. and Mrs. Fred Wilson last Sunday.  
Misses Ann and Cecile Miller are staying home for awhile.  
Gordon May was in bed with "flu" for a few days, but is now up and working again.

Mr. Wilson is having the fence posts for Mr. Lake. John Dalgard is going to build his barn.

**ELMWORTH NEWS**  
(Contributed)  
ELMWORTH, Mar. 31, Annie Gair of Edmonton is staying with her sister, Mrs. R. Hovatt, for awhile.  
Edna went left today for Hays, where she will resume work at Dr. and Mrs. MacRae's residence.

Mr. and Mrs. Ed Dandachuk have moved into the top apartment of the Dickinson apartment house.  
Master John Macklin just returned from Mr. Ross' where a group are busy having lunch. They expect John's brothers down there soon to see him.

**SEEN AND HEARD**  
John (Graham) of the Wapiti ordering "Coke-Cut" tobacco. At Elmer Simons', is it a new brand, John?  
Babe catching snail Friday night. We wonder why?  
Beats and Mac enjoying their supper at the Grande on Friday.  
Marvin driving a bus for the players on Friday.  
Len looking both daring and sarcastic in the play.

## ILLUSTRATED NEWS OF THE WEEK

A SPECIAL TRIBUNE FEATURE

THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

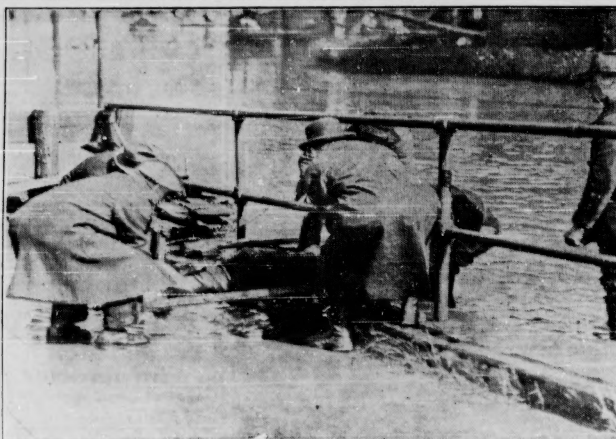

BRITAIN'S LATEST AERIAL DEFENDER HAS UNREVEALED SPEED

The first picture of the Royal Air Force's fastest single-engine bomber, called "Battle," gives a remarkable view of the streamlined retractable undercarriage. Powered by a Rolls-Royce engine and having a maximum speed which cannot be revealed, this new bomber will be delivered to the R. A. F. early next summer. The machines are already in production.

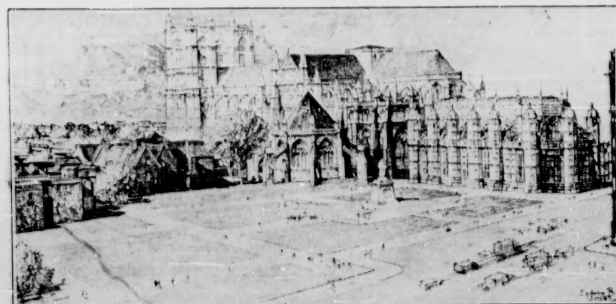

FRENCH TROOPS MARCH ON THE RHINE

This picture shows a regiment of French troops arriving to reinforce the garrison on the left side of the city of Strasbourg. Behind them are the earthworks of one of the steel and concrete fortifications which cover the countryside on the French side of the Rhine.

FLOOD VICTIM GIVEN AID BY RELIEF WORKERS

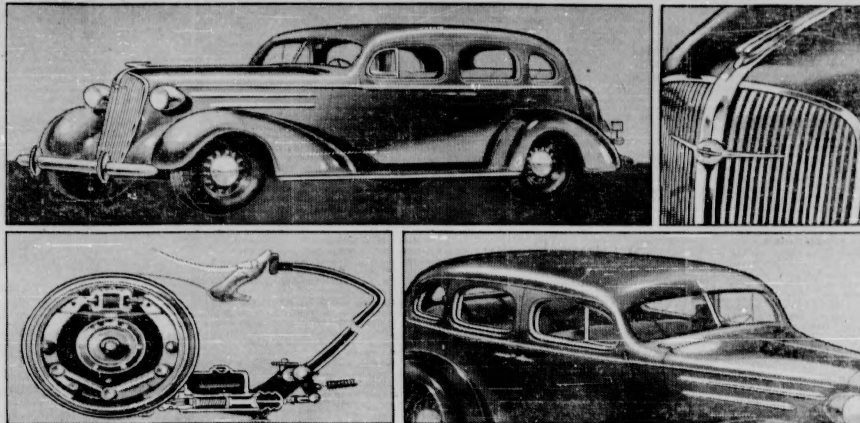

Relief workers in Leobersdorf, Austria, assisted the body of this flood victim as the city started to rebuild untold damage. Thousands were left homeless by the disaster.

THE MEMORIAL TO KING GEORGE SUGGESTED BY THE ARCHBISHOP

An impression by Mr. Sydney Jones of how the proposed statue of King George VI might appear on the site in Westminster which was suggested as a possibility by the Archbishop of Canterbury at the recent Mansion House meeting. Pointing to this spot as the centre of British national and Imperial life, flanked by Westminster Abbey the sacred shrine of British history, and the Houses of Parliament, the scene of its government, the Archbishop offered the suggestion that it was worthy of very serious consideration. In order to erect a statue on this spot it would be necessary to remove the houses on the south side of the area, in Abington Street and Old Palace Yard, and if this were done it would reveal for the first time a truly splendid view of the Abbey rising above its cloisters, and the Houses of Parliament.

## 1936 Master and Standard Chevrolets Replete with New Features

New Master and Standard Chevrolets for 1936 show marked advances in appearance and in engineering. Perfected hydraulic brakes, high-compression engines with full-length water jackets, and balanced carburetion are among the mechanical improvements. The solid steel Turret Top Fisher body is now used on the Standard as well as the Master models.

Chevrolet Sixes for 1936  
More Beautiful Than Ever;  
Performance Thrills On Tap

Today's announcement of Master and Standard Chevrolet Sixes for 1936 brings two favorites into the motor car limelight with sleek new models, considerably redesigned in chassis and body design, more beautiful than ever, and with new performance thrills on tap. These two 1600 lines are being presented to the public at dealer showrooms locally and across Canada.

Both cars have stepped ahead of last year in design and features, but of the two the lower-priced Standard has made the greater advance, appearing in entirely new dress. Last year the Standards differed materially both in appearance and in construction from the Masters; this year, the two lines are identical in most major features of styling, engineering, and performance, the chief difference being a matter of wheelbase.

The Master, offered with its popular knee-action springing, has been restyled in its more important appearance elements, notably by the adoption of a higher and narrower radiator and hood, with a distinctively original radiator grille.

Outstanding among the many new features of both Master and Standard models for 1936 are perfected hydraulic brakes, improved engines having higher compression ratio (6 to 1), balanced carburetor, full-length water jackets, and other changes resulting in better cooling and improved economy and oil economy.

Front doors of all models of both lines are now hinged at the front.

The Solid Steel Turret Top, exclusive last year with the Master models, has been adopted this year for the Standard line also. Spoke-type pressed steel wheels are also seen on all models.

Body interiors of Master models show marked advances in comfort and style. An important innovation is found in the design of the front seat—instead of the usual divided and hinged front seat of two-door models, a single seat cushion extends the full width of the car, permitting three passengers to ride comfortably. The seat back is divided, the right side section being hinged to fold forward.

## Standard Completely New

Chevrolet's Standard models for 1936, besides incorporating features that appear for the first time on the Masters, take their place in the line as entirely new models, with new box girder chassis frame, more powerful engine, longer wheelbase and larger bodies. The line of body types has been increased by the addition of five new models—the Regular and the De Luxe Sedan with built-in trunk, the Regular and De Luxe Coach with built-in trunk, and the Cabriolet.

The standard model wheelbase, formerly 107 inches, is now 106, while its over-all length, last year 170½ inches, is 12 to 13 inches greater. Bodies are longer and wider, with more leg-room, wider seats and additional headroom. Car weight is increased 135 pounds. Springing has been improved by the use of longer front and shorter rear springs, which minimize pitching.

The illustrations show: Top left, the Master Six special sedan, with built-in trunk; top right, the re-styled, deeply moulded radiator grille, used on all models; lower left, the simple arrangement of Chevrolet's perfected hydraulic brakes, all models; and, lower right, a Standard sedan.

Side rails and cross members of the new Standard frame are all of rigid box section, a type of construction that has appeared on costly European cars but never before in the low-price field in this country.

Horsepower of the Standard, formerly 74, has been increased to 79 at 3,200 r.p.m. by changes in combustion chamber design, valve operation, and carburetion, in combination with an increase in compression ratio from 5.5 to 6 to 1.

Clutch improvements include the use of a new "shot-blend" process of treating cushion springs of the disc, and a more accurate alignment of the release levers.

Fuel tank capacity, formerly nine imperial gallons, is now 12. A ventilated generator has been adopted.

Hydraulic Brakes on All Models

In changing to perfected hydraulic brakes on both chassis models, Chevrolet has adopted the principle of hydraulic brake actuation to its own design of brake mechanism within the brake drums. Instead of the cable operated floating cam formerly used at each wheel, a master hydraulic cylinder with double opposed pistons is used to actuate each pair of one-piece articulated brake shoes. The master cylinder, whose piston is moved by the brake pedal to transmit pressure by a column of fluid to each of the wheel cylinders, is mounted on the frame.

Engines of the Master and Standard models are identical in design and in horsepower and torque. Maximum horsepower is 79 at 3,200 r.p.m., an increase of 5 hp. for the Standard.

HOLLAND PUSHES NAVY REPLACEMENTS

The new Dutch cruiser "De Ruyter," built at Schiedam, near Rotterdam, is shown in the fitting-out basin as workmen work overtime to get her completed. The present tension in Europe has called for a general speeding up of all armament projects now under construction.

MANCHUKUO WARNS OF  
MOST SERIOUS CONTINGENCY

HRINKING, Manchukuo, April 2.—Unless the Outer Mongolian government "takes immediate steps to terminate all kinds of provocations against Manchukuo's frontiers, relations of the two countries are threatened with the most serious contingency," the Japanese-sponsored state of Manchukuo warned today.

MOSCOW, April 2.—Soviet dispatches from Ulan Bator early today said Mongolian forces had re-occupied

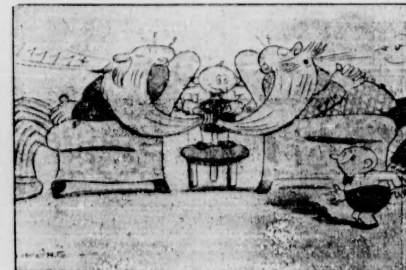

all territory invaded by Japanese-Manchukuo troops, pushing the invaders back into Manchukuo with heavy losses. Fighting lasted all day Tuesday and until daybreak Wednesday.

TOKIO, April 2.—Heavy casualties in Mongolian-Manchukuo border fighting were reported Wednesday in a Japanese military communiqué which claimed a squadron of 12 Outer Mongolian soldiers had invaded Manchukuo. Intimation that the Mongols used poison gas was contained in a dispatch.

DUKE AND BRIDE WATCH HORSE RACING

The Duke and Duchess of Gloucester were very interested in the Staff College and Mounted Infantry Club, Point-to-Point, held at Arburyfield Cross, Berks, and are seen above watching the races through the sunshine roof of their car.

WHEN I CALL READY YOU SHOUT OUT FIRE!

—Korall, Berlin.

## Dark Clouds Hang Threatening Over European Skies

GENEVA, April 9.—French ministers have informed British Foreign Secretary, Lord Halifax, of Germany's continuing violation of treaties, erecting fortifications along the Rhine, and France reserves the right to take any steps the situation may justify. The French point out that building of fortifications in the Rhine zone could be another direct violation of the Versailles Treaty.

PARIS, April 8.—Peace, with permanent air, land and sea forces to maintain it, was provided in a French plan, published today, to organize Europe, with or without Germany, in the aftermath of the Reich's breaking of the Locarno Treaty.

The French plan rejected Adolf Hitler's proposals for settlement of the European crisis, expressing distrust of Germany's intentions and demanding that if Der Fuhrer would refrain from violating European frontiers in the future.

LONDON, April 9.—France's all-European security plan received a lukewarm reception in the morning papers today. Newspapers generally urged the British government to resume its efforts to bring the powers together for the purpose of devising a European settlement. Political and diplomatic circles here today studied the French memorandum. It was understood the Foreign Office was chiefly occupied with two points—the possibility of revising the Versailles peace treaty, and the possibility of winning Germany's promise not to fortify the Rhine.

PARIS, April 9.—Widespread skepticism arose among the French themselves today over their government's new plan for peace in Europe, stirring strong attacks from the opposition. Veteran French diplomats were represented as believing the proposals were "wholly impracticable."

### SNOW RAPIDLY GOING IN THE HYTHE DISTRICT

According to Charlie Martin of Hythe and Beasdale, snow is rapidly disappearing in the Hythe district and if favorable weather conditions continue should be on the land in good time.

The visitor informed The Tribune reporter that Mrs. Brinsford had been quite ill but was improving. Commemoration of the Battle of Vimy Ridge, according to Charlie, will be fittingly celebrated by the Hythe branch of the Canadian Legion, the celebration to take the form of a banquet.

## News Hound REPORTS

THAT literally thousands upon thousands of slugs have been received from the studios of Edmonton's big thousand-watt, and the staff is nearly frantic getting them sorted and organized for the judges. But the winners will be announced April 10, as scheduled, so be patient.

THAT amateur nites are clicking in a big way. Manager Walter Wilson of the Capitol Theatre is looking forward to the arrival of winners from Camrose, where the theatre has been holding an elimination contest with a view to having its winners over a period of weeks appear on the Capitol stage at Edmonton. April 10.

THAT the new Hammond electric organ is still very much the news of the moment at CICA. The organ, with its play-by-play of the Allen Cup playdowns, as well as the running story of the Stanley Cup matches, Imperial Tobacco and General Motors are the sponsors behind these features.

THAT with big-time hockey very much in evidence, CICA is furnishing invaluable broadcasts to their listeners with the play-by-play of the Allen Cup playdowns, as well as the running story of the Stanley Cup matches. Imperial Tobacco and General Motors are the sponsors behind these features.

THAT the Commercial Grade, world champion basketball series, which will start with two games in April 11, it is likely that some of the games in this series will be broadcast.

EDMONTON, Mar. 25.—Placing another milestone on the road of Canadian broadcasting, station CICA, Edmonton's thousand-watt, launches a new spring program schedule backed by many studio innovations. Ranking as the first Canadian station to install and broadcast the new Hammond electric organ, CICA acts a new high in keeping abreast of the times.

With the advent of April, and the new spring program, CICA steps to the fore, not only with the presentation of the Hammond organ but with the installation of the standard equipment of the new Western Electric "right-hall" dynamic mikes, where striking quality and non-directional set-up make for bigger and better broadcasts. These additional facilities were carefully and thoroughly investigated by CICA's technical director, whose trip to New York and Chicago in 1932, where the standard equipment to use similar microphones and

organs in action and to check their performance, closed the season.

Matching the modern touch in microphones and organs, the studio of CICA are undergoing a redecorating period, with the modern motif predominant.

Matching the decorative and technical improvements comes CICA's "Golden" schedule program, headed by the Hammond organ, as might be expected in several feature broadcasts daily.

## Reminiscences Of Early Days

(Continued from Page One)

the late Rev. Marjorie Johnson of Spirit River. Rev. Mr. Forbes and his first service at the home of Mr. Reid Stone, Beaver Lodge, August 1909, where Anglican services had been held by the Rev. T. W. Moxley.

In 1910 the Forbes returned with a Miss Baird, a pioneer nurse sent out by the W. M. S. The "manse" (a black overhanging flying shot lake) housed not only Rev. and Mrs. Forbes and Miss Baird but also a broken-down man from Peace Coups—Oscar Kibbes as the poor farmer who suddenly came rich, and his ambitious wife, Zola Kibbes, who goes highbrow and tries to break into society. Edna, the daughter, is a blundering promotion salesman, while Rose Alexander and June Martel have romantic roles.

"Going Highbrow" boasts a group of comedy stars of high repute—Oscar Kibbes as the poor farmer who suddenly came rich, and his ambitious wife, Zola Kibbes, who goes highbrow and tries to break into society. Edna, the daughter, is a blundering promotion salesman, while Rose Alexander and June Martel have romantic roles.

In 1911 the Forbes fled on the homestead on which the Municipal Hospital and public school now stand. The Forbes family gave \$1,000 to the hospital, and the Forbes family gave \$1,000 to the hospital, and the Forbes family gave \$1,000 to the hospital.

In 1910 regular services were commenced in various homes in Beaver Lodge, and at Mr. and Mrs. Henry Roberts' home at Beaver Lodge, and at the late W. M. Smith and sons in Grande Prairie.

The next summer saw the first Presbyterian and Methodist churches erected in Grande Prairie. The first Methodist church was erected at the first wedding at Twin Lakes (now Clairmont) where the Rev. Mr. C. P. Anderson, and the pastor received two pounds of butter for his services.

March 1911 Dr. Sproule and his wife, Mrs. Sproule and their family arrived and established the first dental office. The following year the Rev. Dr. J. C. Ward arrived and his son, Rupert, the second.

In 1911 Mr. Clarke (with wife), the late Mr. J. C. Ward, and his son, Rupert, the second. The first fall the late John MacAuley and Wm. Caldwell arrived and opened a fur trading post and general store. Then Messrs. Wm. Innes and Frank Louder opened a branch of the Imperial Bank (now the P. O.) and A. Patterson, early in the year where the Imperial Bank now stands.

In the fall of 1912 W. C. Pratt arrived and the following year in November, 1912, with Mrs. I. V. Macklin as teacher and about a dozen pupils and where the Patterson-Lumber Company buildings now are.

The late W. M. Smith's store now operated the first butcher shop, and Jack DePencier was the first jeweler, while the late Mrs. L. Breckenham, owned the first hotel. Wm. Salmont put up a large hotel in 1912 where the Miramichi store now stands.

The only building on the original townsite when the Pattersons arrived was the log shack owned by Mr. and Mrs. Hien (the latter is a sister of Mr. Alex. Wether).

## Highway Matters

(Continued from Page One)

The committee, which is provisional, was instructed to report as soon as possible.

It was the unanimous opinion of the meeting that the Peace River should be represented at Vancouver.

In connection with highway matters the following resolution was read, and following reading of a letter from the Dominion Department of Labor, the following resolution was passed:

"That this Board of Trade ask the Alberta government to include a permanent direct Peace River highway in the list of suggested highways upon which assistance is being asked under the unemployment relief program of the Dominion government."

It was contended by the members of the executive that the Peace River was entitled to its fair share of the money provided for the purpose of relief to be used principally in highway construction.

Another resolution relating to highways which met with general approval is as follows:

"That the provincial government be asked to discuss this year a definite graveling program in the Peace River."

During the discussion which revolved around this resolution it was pointed out that the Peace River highways were at times impassable and the opinion expressed was that the north country had been neglected and the time had arrived when it should get recognition in the way of proper highway construction.

A letter was read from the Edmonton Board of Trade asking support for the meeting up of the 15th district of a highway. Many arguments were advanced in support of this suggestion.

The subject of better live stock was discussed, to which Mr. Black, District Agriculturalist, and W. J. Thomson spoke.

T. Blair, chairman of the membership committee, reported progress. He stated that the committee had met and were about to launch a vigorous campaign for members.

PREPARING FOR "MAD DOG ACT" LONDON, April 8.—Lord Mussolini should be guilty of what Sir Samuel Hoare once described as a "mad dog act" because Britain is now pressing hard at Geneva for fresh sanctions against Italy, so as to prevent Ethiopian armies from being annihilated, the British Admiralty is feverishly constructing fresh fortifications in the Mediterranean, strengthening existing naval bases, planning new bases and adding to the fleet's equipment of anti-aircraft guns.

## MUTINY AHEAD? FEATURES

GOLD CHASE TO SOUTH SEAS "Gold" is the magic word of today, today, and tomorrow, and it is to the South Seas that the gold seekers are flocking.

In "Mutiny Ahead," a majestic picture double-featured with "Going Highbrow" played at the Capitol Theatre on Monday, Tuesday and Wednesday, April 13, 14 and 15, the promoters are on board heading for the South Seas with the knowledge of hundreds of thousands of dollars of gold lying on the bottom of the sea.

Supplies of gold are being hoarded by the government of India, chartered by Kathleen Burke, a wealthy society girl, with whom Neil Manton is featured. They are supported by well-known Hollywood favorites—Leon Ames, Noel Francis, Paul Fix, and George O'Hara.

"Going Highbrow" boasts a group of comedy stars of high repute—Oscar Kibbes as the poor farmer who suddenly came rich, and his ambitious wife, Zola Kibbes, who goes highbrow and tries to break into society. Edna, the daughter, is a blundering promotion salesman, while Rose Alexander and June Martel have romantic roles.

"Going Highbrow" boasts a group of comedy stars of high repute—Oscar Kibbes as the poor farmer who suddenly came rich, and his ambitious wife, Zola Kibbes, who goes highbrow and tries to break into society. Edna, the daughter, is a blundering promotion salesman, while Rose Alexander and June Martel have romantic roles.

GOLDWYN'S "DARK ANGEL" IS STIRRING EMOTIONAL DRAMA "The Dark Angel" Samuel Goldwyn's gripping romantic drama, starring Frederic March, Marie Olson and Herbert Marshall, will be the feature attraction at the Capitol Theatre for Thursday, Friday, Saturday and Sunday.

This powerful and beautiful love story set in a lovely quiet corner of rural England, reflects the hearts of a woman and two men—one of whom she loves, while the other loves her. Others prominent in the supporting cast are Jack Heston, John H. Heston, Henrietta Crossman, Frieda Innes, Claude Allister, George Bracken, David Torrence, and Cora Sue Collins.

"30 STEPS" IS GAY, FAST AND SPARKLING MYSTERY DRAMA From the pen of our own Governor-General, a sparkling mystery, "30 Steps" (Twentieth Century Fox), comes the peace-time story of secret service in a thrilling and dramatic climax is reached when a young Canadian adventurer finds himself involved in a plot by a girl who double-crossed him. Robert Donat and Madeleine Carroll are the subjects of a mysterious and romantic theme in "The 30 Steps" showing good Friday and Saturday at the Capitol Theatre.

As the daring Canadian who heroically saves the world from a third world war, the Ministry of Secret being taken out of the country, Robert Donat, remembered for his brilliant performance in "The Count of Monte Cristo" is paired with Madeleine Carroll, beautiful and talented blond star of "Was a Spy" and "Love of a Dictator." Lucie Mannheim, Geoffrey Trevelyan, and Peggy Ashcroft form the supporting cast.

"The 30 Steps" a GE production.

G. P. SADDLERY BUYS STOCK OF J. C. WARD'S HARNESS SHOP A. A. Nelson, proprietor of the Grande Prairie Saddlery, completed the purchase of the J. C. Ward's harness shop and stock of J. C. Ward's harness shop and stock of J. C. Ward's harness shop.

The shop formerly operated by Mr. J. C. Ward has been closed, as he is retiring from business in Grande Prairie.

GUNDY NEWS GUNDY, B.C., April 7.—Our fine weather varied in two inches of snowfall.

Cyril Abbot is having a real trying time with his arm. May have to operate on it in a day or two.

NURSE GIVES INTERESTING TALK AT AID MEETING The Ladies Aid meeting at Mrs. Young's on April 7 was very well attended. Miss Mahan, the district nurse, attended and gave an interesting talk on her work in the outlying areas. We hope to see her with us at the next meeting, which will be at the W. W. Smith home.

Several men of the district journeyed to Peace Coups Friday to secure their seed grain. G. A. Keller saved his summer's work last Wednesday.

Walter Hamilton and son were callers at L. L. Husky's on Sunday. E. Taylor lost a good horse last week.

C. P. Tremblay and son, Cecil, were busy with their work in Grande Prairie last week-end.

We are glad to report that the "flit" is about over in this part. Nearly every family has had a stage of it.

SPECIAL EASTER SERVICES There will be special Easter services next Sunday. The choir are practicing at Mrs. Young's each week.

Mrs. Harold Leferson was visiting her parents, Mr. and Mrs. Geo. Browncombe, last week.

TEACHER OPERATED ON Kenneth McKenzie, our teacher, was rushed to the hospital, where he was operated on immediately for ruptured appendix Friday night.

OBITUARY Little Caroline Brackman, two-year-old daughter of Mr. and Mrs. Geo. Brackman of Peace Coups, was buried on Wednesday morning. Relational pneumonia caused the death of the little one. Sympathy of numerous friends was extended to the bereaved.

BURLIN, April 9.—Vulich press directed a brooding of criticism today against the French plan for European peace.

Peary Blake, Marian's cousin, the outdoor girl—Dorothy Guthrie. Peary Blake, Marian's cousin, "On-the-dance" type—Lillian Hean. Peary Blake, Marian's cousin, full of poetry but not bubbling over—Loren Fitzpatrick.

Don Eakin, Marian's special girl friend, nothing happens that she won't find out—Savanna Hean. Bridget O'Hara, the most well liked poet and strident tongue—Frances Spicer.

Police Constable, who arrives at almost too late for the "Catch of the Season"—Bill Heurigan. House guests at birthday party—Misses Alice Lavalley, Joyce Tofer, MacLure Lantot, Beine McKinney, Nellie O'Connell, Carolle Helwa, Shirley Carter, Nora Coney, Elizabeth Minor Antonio.

Professional entertainers: (a) The "Lady in Red"—Mrs. Clarence Shields.

"Mystery Theater." (b) "End of a Perfect Partnership"—Signor Conversazione, the world's worst ventriloquist. Tom Mather, Dungen, Doll, Joe Putters. (c) Candle Chorus. "Amateur" Guests "Go Free." (d) "Admiral Bebebebe" with as many of the ship's crew as are not confined to barracks.

Orchestra Accompaniment—Director: Mr. Tom Wilson. Pieces: Mrs. Geo. Tate, Miss Frieda Hamilton, Miss Hillman, Mike Harvey, Eric Olsen, Mike O'Flynn, Warren O'Dell, Musical Numbers: Hello, Hello, "Barefoot Trail," "Rhapsodic Variations," "Shooting High," "Twinkle Little Star," "Lady on Red," "Smiles," "Spring Song," "I Joined the Navy," etc.

Evening prices are: Adults, 50 cents; children, 25 cents. The special matinee after school, 4:15 o'clock, is specially for children and they will see the complete show for 10 cents.
